SUNREEF 60 POWER

The system includes an upgraded AC-230V and DC-24V setup with enhanced switchboards, chargers, inverters, and lithium battery capacity increased to 56 kWh. It features two generators (11KVA and 22.5KVA), additional lighting upgrades including LED lamps, underwater lights, and exterior lights. A domotic system is integrated for controlling lighting, navigation lights, blackwater systems, and monitoring tank levels, battery status, and engine room temperature. These upgrades ensure efficient power distribution and advanced functionality.
